THE
GUINNESS
DISC OF RECORDS

SECOND EDITION

THE
GUINNESS
DISC OF RECORDS

SECOND EDITION

Avoid touching or scratching
the surface of the disc

Store the disc in its box
whenever possible

GETTING STARTED

Turn on your Amiga CD³² and television set (or monitor) if they are not already on. Insert the *Guinness Disc of Records* disc into your player.

After a few seconds, you will see the opening screens and then a Leprechaun guide will give you a short introduction to the disc. At anytime during this introduction you may press the blue button labeled "■" on your controller to interrupt the Leprechaun and start using the title.

USING YOUR CONTROLLER

Guinness Disc of Records is easy to operate. You only need to use the **Directional**, **Select** and **Go-Back** buttons on your controller.

The **Directional Button** (the large round button on the left side of your controller) moves the on-screen arrow-shaped pointer.

Pressing the **Select Button** (the red button on the right side of the controller with the $\downarrow$ marking) initiates "action".

Pressing the **Go Back Button** (the blue button on the right side of the controller with the ■ marking) stops the current action or “goes back” to where the action was initiated.

Every time you move the pointer over something that can be selected, the pointer changes. This lets you know that you can press the **Select Button** to choose it.

MAIN MENU

After starting your **Guinness Disc of Records** title, you will see a screen which has twelve large boxes on the upper portion, and four symbols along the bottom. This is the **Main Menu**.

All records in your Guinness Disc of Records title have been split into **Chapters**. The chapters are represented by the twelve drawings in the top part of the Main Menu screen. If you select a drawing on the Main Menu, you'll go to the first record in that chapter.

If you don't select a chapter after several seconds, the

drawings will change to photos. These photos represent specific records. If you make your selection when there is a photo, you'll go to the record associated with that photo.

At the bottom of the screen are symbols which allow you to find a specific record, see an audiovisual tour, or get help.

MAIN INDEX

The symbol at the bottom of the screen shaped like an index card is the Main Index symbol. Selecting this symbol takes you to the **Main Index** which allows you to search the disc for specific records.

TOURS

Selecting the Video Camera symbol will take you to another menu from which you can see an audiovisual tour.

SUPERLATIVE

Selecting the Compass symbol takes you to the **Superlative Menu**. Here you can search the disc for the longest, the shortest, the oldest, the biggest, the most, etc., of any record on this disc.

HELP

Clicking on the Question Mark symbol wakes up the Leprechaun. This little guide will explain the screen you are currently on. When he is finished talking, you can either click something else on the screen to get further explanation or press the ***Go Back Button*** to put him to sleep.

CREDITS

The drawing in the lower right-hand corner of the Main Menu is the Credits button. Selecting this will show you who helped to make this title, the second edition of the ***Guinness Disc of Records***.

MAIN INDEX

In the ***Main Index*** you can search the disc for a specific subject area. Type the first three letters of a word which best describes your area of interest. Selecting a letter will add it to your entry at the top of the screen. When you have entered your three letters, clicking on the Checkmark symbol will bring up a list of subject areas based on your entry.

For example, if you want to know more about dinosaurs, select the letters "D", "I", "N", and you'll see the letters appear at the top of the screen. Click on the Checkmark symbol to display the list of subject areas. If you press a letter by mistake, select the Cross symbol to remove it.

Selecting an item in the list of subject areas will display another sorted list of associated record titles from which to choose the article you want.

The red up and down arrows on the left side of the screen let you scroll up and down through the list of subject areas.

Selecting the Blue Arrow symbol at the bottom of the screen will take you to the Main Menu which allows you to see the records according to which chapter they are in.

LIST OF RECORD TITLES (from the Main Index Screen)

After clicking on the Checkmark symbol, you see the list of associated record titles. From the list of record titles, you select the specific record you would like to see.

If the list is longer than one page, clicking on the up-turned

corners will take you to the next or previous page.
Press the **Go Back Button** to return to the Main Index screen.

TOURS

In the **Tours Menu** you can select a picture to see an audiovisual tour about some of the interesting facts on the **Guinness Disc of Records**.

You have the choice of seeing a tour about the Earth and Space, the Human World, the Natural World, Record Breakers, Sports and Games, or Transportation. At anytime during a tour, you can press the **Go Back Button** to return to the Tours menu.

SUPERLATIVE MENU

The **Superlative Menu** allows you to search the disc for the longest, shortest, oldest, biggest, most, etc., of any record on this disc.

Use the up-turned corners to page through the lists until you find the superlative which describes the record you want to see. Clicking on an entry will take you to a list of associated record titles from which you can select the record you are interested in.

LIST OF RECORD TITLES (from the Superlative Menu)

From the list of record titles, you select the specific record you would like to see. If the list is longer than one page, clicking on the up-turned corners will take you to the next or previous page. Press the **Go Back Button** to return to the Superlative Menu screen.

ARTICLE SCREEN

The **Article Screen** is where you actually read about a record. If there is more information than will fit on one page, clicking on the up-turned corners will take you to the next or previous pages of information.

Selecting the blue arrow pointing to the right (at the bottom of

the screen) will take you to the next record in the Chapter. The blue arrow pointing to the left will take you back to the previous one.

ARTICLE PICTURES

Many of the articles have pictures associated with them. If an article does not have a picture, it will have a generic background with the title of the Chapter written on it.

Clicking on the picture will display the caption and title for the picture. While reading the caption, to see the full image, click a second time while the pointer is over the picture. While looking at the picture, you can press the **Select Button** to see the caption again, or the **Go Back Button** to return to the record.

ARTICLE SOUNDS

Some of the articles have digitized sound files associated with them. If a file has an associated sound file, the pointer will change to look like a speaker. Simply click on the article while the pointer is shaped like a speaker and the sound will be played.

SERENDIPITY

If you don't use the title for several minutes, the Serendipity feature will be invoked. When in this mode, the title will display random full-screen images.

At any time you can press the **Select Button** to see the article associated with the picture, or press the **Go Back Button** to return to the Main Menu.

THE

GUINNESS

DISC OF RECORDS

SECOND EDITION

The Guinness Book of Records comes to life with graphics, full-color photographs and high quality sound.

Instead of flipping back and forth in the pages of a book, just a few simple button presses set the program in search of the information you're interested in.

- Hear the world's fastest talker instead of just reading about him.
- Hear what the world's loudest insect sounds like.
- See and hear an overview of the topics with an audiovisual tour.

The Guinness Disc of Records features over 6000 examples of the fastest, the highest, the first and the best, accompanied by hundreds of full-color photographs, illustrations, and sound samples that you can see and hear at the touch of a button.

Why fill a shelf when you can fill your mind?
